

VoIP Engineer (M/F)

- Company: Eyepea is a small but very innovative integrator of VoIP (Voice over IP) solutions based on Open Source software.
- Region: Tubize (Zoning of Saintes, near Halle)
- Job description:
 - Pre-sales:
 - Assist the sales team to technically position the solution to customers
 - Help design the technically adequate solution
 - Post-sales:
 - Install the solution at the customer
 - Provide technical support to customers
 - Train customers
- Required experience:
 - Technical expertise in
 - Voice over IP (VoIP)
 - Linux
 - Networking
- Additional assets:
 - Experience with Open Source software such as Asterisk
 - Software development experience in PHP/MySQL
- Candidate profile:
 - Motivated and enthusiastic person
 - Customer driven
 - Ability to integrate with existing team
- Languages:
 - Fluent in NL/FR (very important to have someone who can work in both languages, especially in NL)
 - Technical English
- Package: to be negotiated
